Membuat Chrome Text Effect

Posted by Sigit eko in Belajar Photoshop, Photoshop Menengah on 01 28th, 2009 | 19 responses

Text effect lagi aah.. hehehe.. gpp kan.. sekarang cara bikin chrome text dengan blending option..

pertama buat dokumen ukuran 400 x 400 px, jangan lupa set dulu background (hitam) dan foreground color nya (putih)

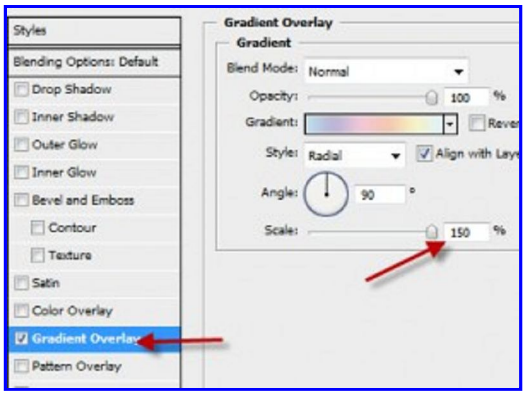

Buat tulisan apa aja asal gak terlalu banyak pake font yang gempal-gempal gitu… hehehe.. Saya pake font Anja Eliane bisa didownload disini

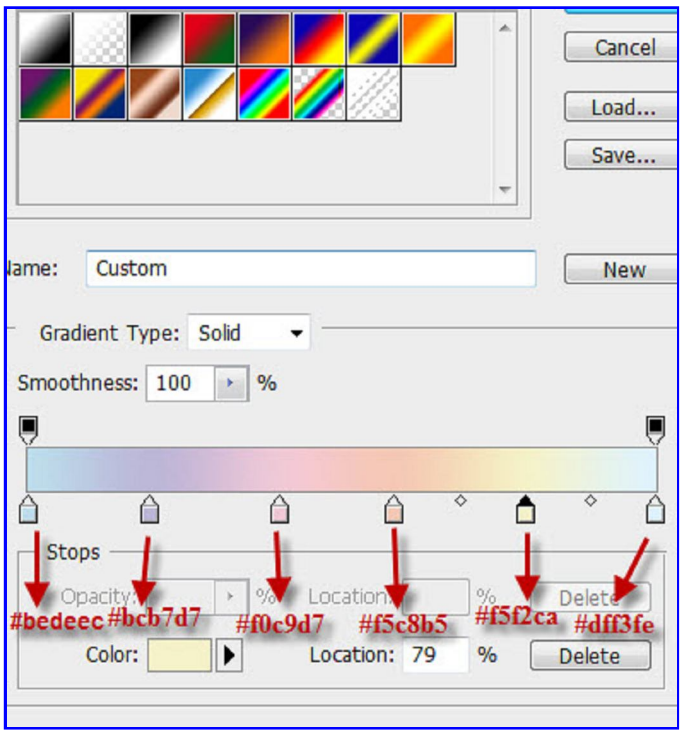

, kalo mau download font silahkan klik disini

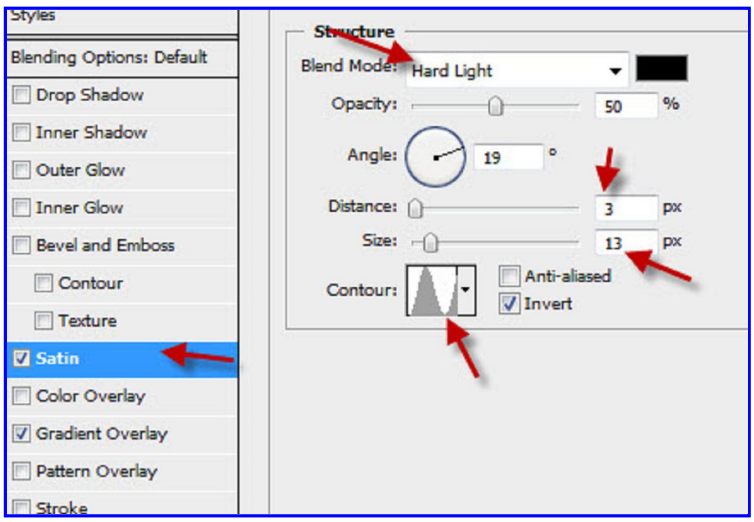

klik kanan layer tulisan tadi klik blending option… Contreng gradient overlay untuk menambahkan efek gradasi setting seperti di bawah

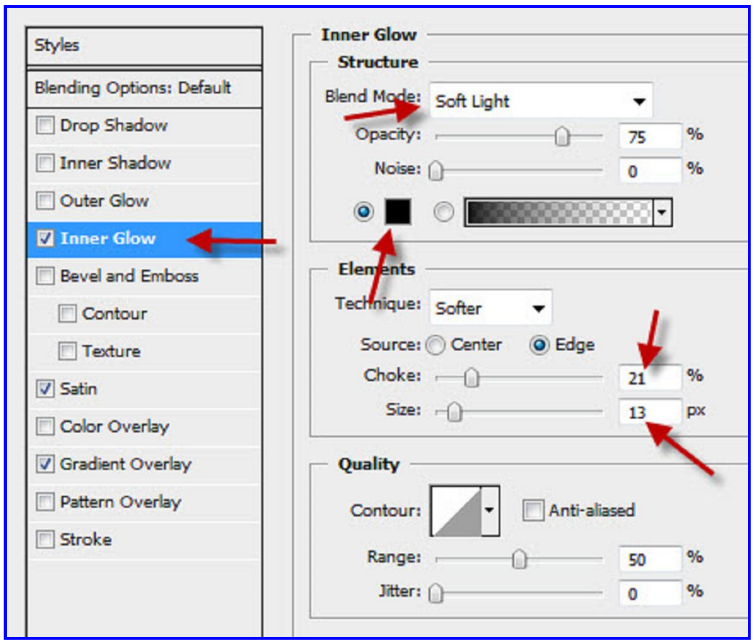

Untuk mendapatkan warna gradasi seperti di gambar , setting gradient nya dengan kombinasi warna yang soft.. seperti ini

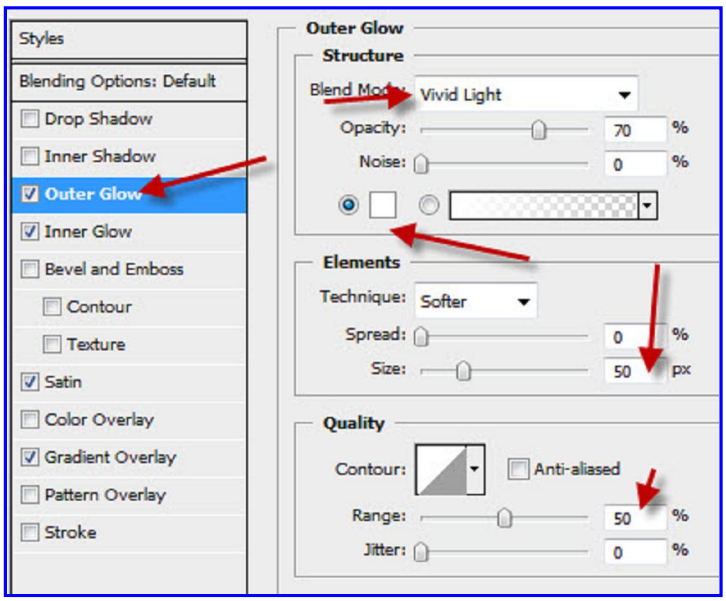

jangan klik OK dulu, lanjutin dengan contreng satin , setting seperti ini :

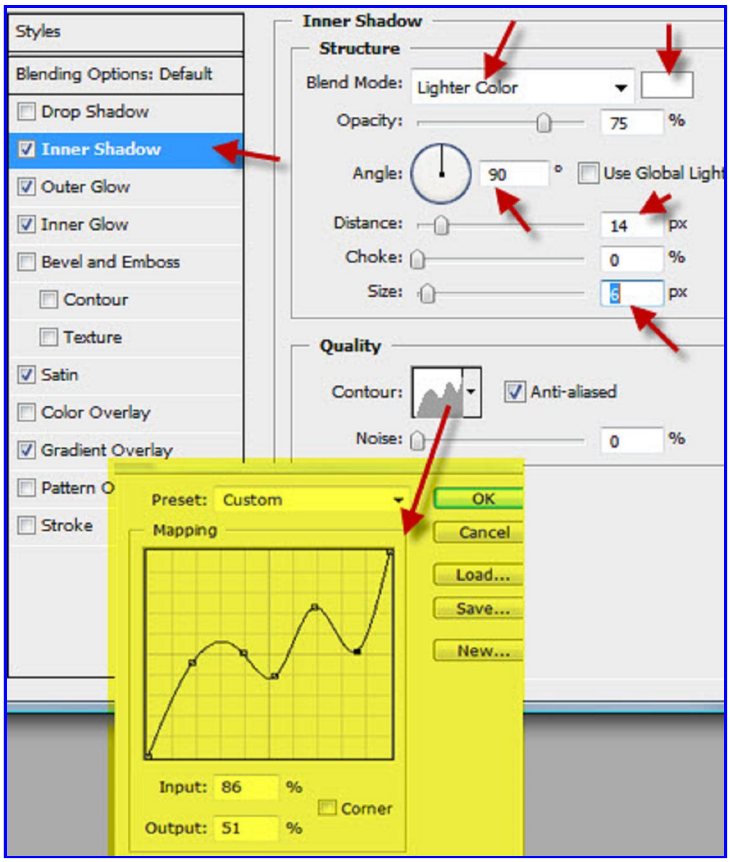

Jangan dulu di Ok… skarang contreng inner glow, setting seperti dibawah :

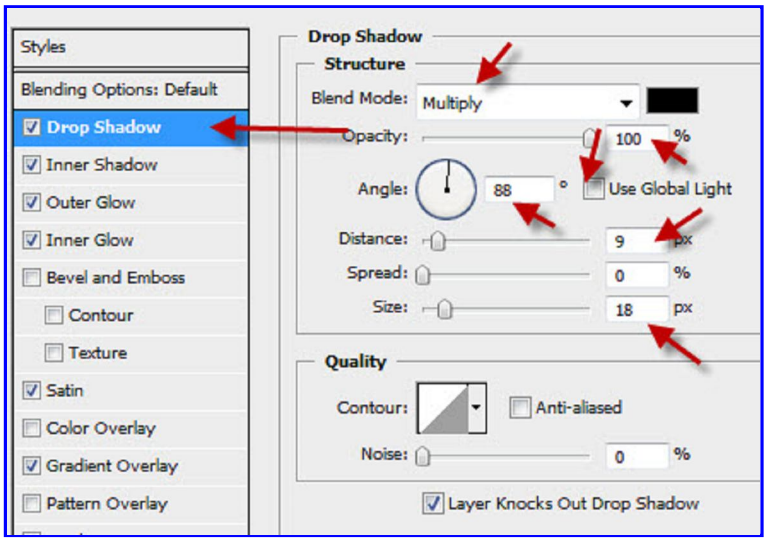

Masih… jangan dulu OK sekarang kita contreng outer glow, setting seperti ini :

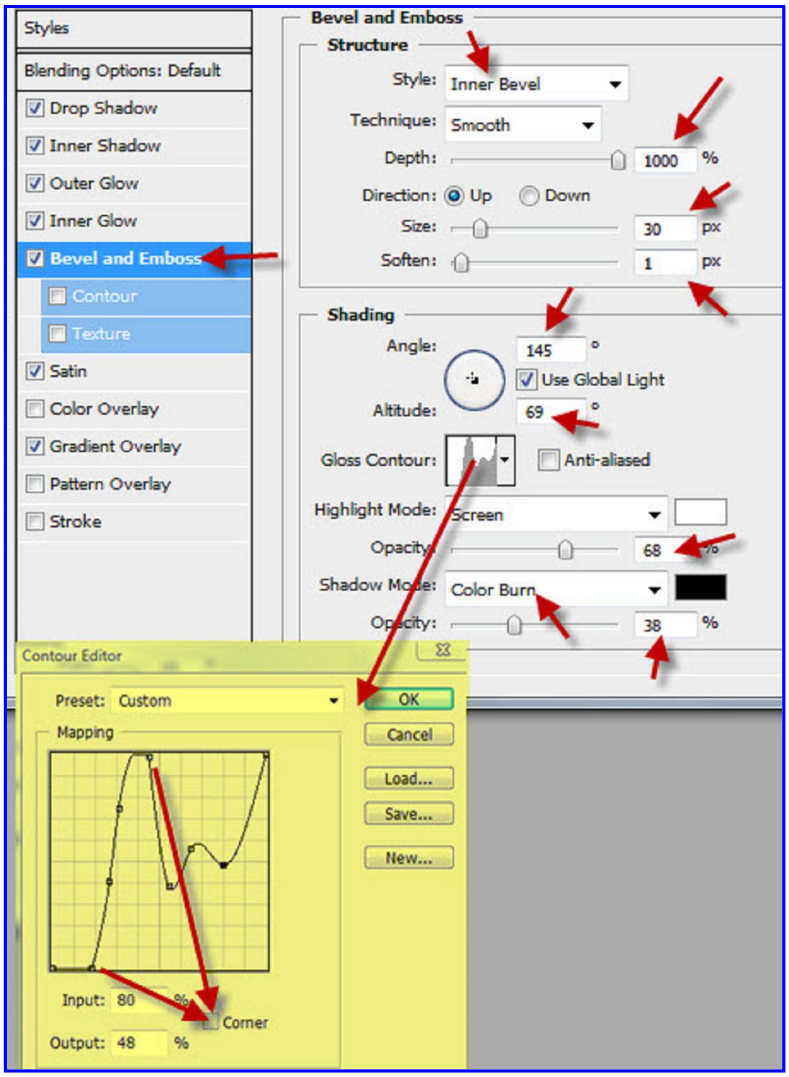

Sabar… jangan dulu di OK.. skarang contreng Inner Shadow , setting seperti dibawah :

Nyaris selesai nih..tapi jangan dulu di OK , contreng drop shadow , setting seperti ini :

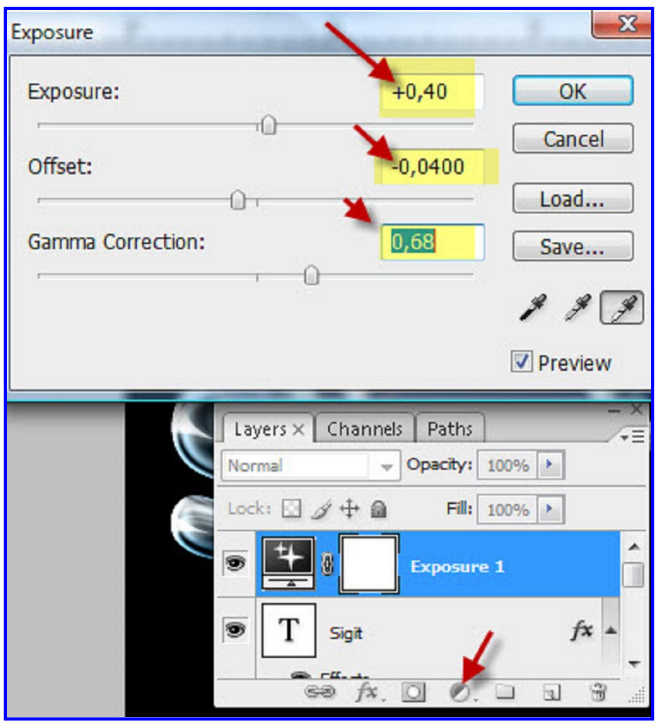

fiuh… akhirnya..Yang terakhir… contreng Bevel and Emboss, terus setting seperti dibawah :

Hasilnya kita gelapin dikit ya.. biar keliatan mengkilapnya..

klik adjustment layer > exposure (catatan : adjustment layer adanya di Layer Palette , yang ada panah merah nya dibawah)

Hasil yang dicapai setelah melalui perjalanan panjang, ternyata gak sia-sia..

selamat mencoba..
